DETAILED ACTION

1. Applicant's amendment filed 11/5/04 has been received and considered.

Claim Rejections - 35 USC § 112

2. Claims 1-6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Regarding claim 1 it is unclear from lines 9-12 what applicant means by "the membrane defining an aperture..". How does the membrane "define" or comprise an aperture? From the specification at page 6 it appears the "aperture" is in fluid support 54.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3,5,6 are rejected under 35 U.S.C. 102(b) as being anticipated by Vermolen et al.

Regarding claim 1, as best understood, Vermolen et al. discloses a container having first and second chambers 36,40, a piston rod 44, a piston 38, a valve 60 (note

Art Unit: 3683

the aperture at 106 or 98), a pressure signal supplied from an air spring to the valve (see col 3 lines 37-41), the valve functioning as claimed.

Regarding claim 2 note downtube 62. The chambers 36,40 communicate with an outlet at either 92 or 94 to in turn communicate with each other, as broadly claimed.

Regarding claim 3, as broadly claimed, these requirements are met at 78 in figure 3.

Regarding claims 5,6 these requirements are met. Note the discussion in column 3 and the control lines at 32.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 3683

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claim 4 rejected under 35 U.S.C. 103(a) as being unpatentable over Vermolen et al. in view of de Molina.

Regarding claim 4 simply to have used more than one disk in the area of 78 of Vermolen et al., as taught by de Molina at 136, would have been obvious to the ordinary skilled worker in the art simply to control the level of fluid flow through the valve to a desired level and therefore attain the damping characteristics desired from the suspension system. Note the through-hole at 106.

Response to Arguments

8. Applicant's arguments filed 11/5/04 have been fully considered but they are not persuasive. See the action above.

Allowable Subject Matter

9. Claims 7-17 are allowed.

Conclusion

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3683

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
